Model HM-3954 Portable Communications Assistant

DESCRIPTION:

The HM-3954 Portable Communications Assistant (PCA) provides a two way messaging device without the need to add any extra paging equipment. Utilizes existing Sentry Freedom wireless network. Messages sent from the Sentry Freedom computer may be addressed to an individual PCA or to a group. Acknowledgment returned to host when message received. Transmits low battery warning to the Sentry Freedom software. The Sentry Freedom software will alert if the PCA does not check-in.

FEATURES:

Compact and lightweight that operates using a simple menu-driven, five-button user interface presented on an easy-to-read screen with backlight. Display accommodates 7 lines of 16 characters each with multi-level menu structure. Two multi-function soft keys, one enter key and side mounted key for scrolling. Convenient holster accessory included.
