## **Model HM-546 WIRELESS REMOTE PENDANT**

- SINGLE PUSH-BUTTON PENDANT
- MAINTENANCE FREE
- 5 TO 10 YEAR LONG-LIFE BATTERY
- FACTORY SEALED - WATER PROOF
- OVER 60,000 DIGITAL CODES
- COMPLIES TO FCC PART 15

### **DESCRIPTION:**

The Model HM-546 wireless remote pendant is a miniature transmitting device designed to remotely summon help from anywhere within a typical residence. The pendant will operate up to 300 feet from the receiver in an unobstructed environment. The remote pendant is supplied with a long chain for wearing around the neck.

The pendant is maintenance free with no batteries to replace. It has a 5 to 10 year life and can provide over 100,000 operations. The attractive Off-White colored plastic case is factory sealed against moisture intrusion and corrosive environments. Pendants are not meant for constant exposure to water for extended times, or exposure to high temperatures, chemicals, soaps, cleaning agents, solvents, etc. The user of the pendant should be made aware of these limitations.

The pendant transmitters have almost 64,000 possible code combinations. They are encoded at the factory before shipment. During system installation, each receiver is programmed to respond to a specific pendant code.

The pendant measures 1.2" x 1.35"

### **ARCHITECTS' AND ENGINEERS' SPECIFICATIONS**

#### **SENTRY MODEL HM-546 WIRELESS PENDANT**

The Model HM-546 Wireless Remote Pendant shall be a miniature, single button device, with a neck chain. The HM-546 shall operate as a portable call switch within an apartment and shall send an emergency call to the console in the same manner as a hard wired call panel. The Pendant shall be capable of having over 60,000 individual codes and shall include a lifetime battery good for 10 to 20 years. The pendant shall be sealed and water-tight and shall not have its operation degraded when worn in the shower.
