**Model HM-558  
WIRELESS RECEIVER  
POLARITY GUARD**

- Provides polarity protection for Wireless Receivers when powered by Type "B" smoke detectors

**OVERVIEW:**

The HM-558 provides reverse polarity protection when using wireless receivers that are powered by the HM-560B smoke detectors. The HM-560B "type B" smoke detectors utilize reverse polarity on the power leads to sound all the smoke horns in the apartment when any one device senses smoke. Since the wireless receiver uses this power for operation the polarity guard ensures that the proper polarity power is supplied to the receiver at all times.

**INSTALLATION:**

Red/Black tracer wire connected to 12 volts DC from HM-560B smoke detector. Red wire connected to HM-547 wireless receiver 12 Volts positive (red). Black connected to HM-547 wireless receiver 12 V negative (black).

**SPECIFICATIONS:**

Dimensions: 6.8" L X 1.31" W  
Wires: 22 awg. Topcoat
