Model HM-582 HOST PANEL CONNECTOR

- POLARIZED
- SELF LOCKING
- 7" 22 GAUGE WIRE PIGTAIL LEADS
- PRE-STRIPPED AND TINNED ENDS
- 15 CONDUCTOR
- COLOR CODED

DESCRIPTION:

The Model HM-582 Connector is designed to mate with the circuit board connector on the Model HM-527 Sentry Host Panel and Model HM-528 Utility Host Panel.

The connector is prewired with 7" color coded wires that are pre-stripped and tinned to facilitate ease of installation and maintenance.

The connector is polarized to assure proper mating.

Locking tabs are included to prevent accidental disconnect.

The 15 wire leads connect to all residence and data line wiring. Connections are included for remote call switches, smoke detectors, wireless pendant receivers, intercom panels, security devices, and dome lights.
