HERITAGE MEDCALL TECHNICAL SPECIFICATIONS	Model HM-665 MEDICAL HISTORY OPTION
• STORES MEDICAL HISTORY INFORMATION • DISPLAYS AND PRINTS INFORMATION • FILES UPDATED ON ANY OFFICE COMPUTER	

DESCRIPTION:

The Sentry Model HM-665 Medical History Option provides an instant medical history report of the residents in an apartment when an emergency call is initiated. The emergency call is alarmed on the video screen and at the same time, the Sentry printer produces a medical history report. All other printer functions are temporarily suspended until the medical history report is completed.

The typical medical history report consists of: name, apartment number, date, time, physician, medications, hospital, nearest relative, emergency health data, and medical history. The Medical History Option consists of a 3.5" disk drive and the Sentry Medical Files program disk. The Sentry console must be equipped with a Model 516 printer. Medical history files are stored as text files by apartment number. The medical files disk is loaded into the medical files disk drive on the master controller.

When an emergency call is received, the controller will read the file on the disk and print out a report by pressing a single key on the keypad.
