

HERITAGE MEDCALL TECHNICAL SPECIFICATIONS

Model HM-685 STROBE LIGHT

- 15/75 CANDELA
- 12V DC
- 160 mA CURRENT DRAW

DESCRIPTION:

The Model HM-685 Strobe light connects to the call acknowledge output of a residence host panel to provide visual annunciation of an emergency call.

Provided for universal mounting to most any style single or two gang box, or octagonal style electrical box with supplied hardware.

Screw terminals for ease of wiring.

Tested for 75 candela brightness on axis.

The strobes use a Xenon flashtube with solid-state circuitry enclosed in a rugged polycarbonate lens to provide maximum visibility and reliability.
